Technical Skills

Languages: Python, JavaScript, TypeScript, Java, SQL

Web & APIs: React, Node.js, Flask, REST APIs, HTML/CSS

Data & Engineering: Apache Spark, ETL Pipelines, Data Modeling, SQL Optimization, Statistical Analysis

AI/ML: LLM Deployment & Fine-Tuning, RAG, LangChain, FAISS, scikit-learn, PyTorch, NLP, Feature Engineering

Finance & Quant: Financial Modeling, Risk Modeling, Regression Analysis, Time-Series Analysis

Tools: Git, GitHub Actions, Docker, Firebase, PostgreSQL, MongoDB, Gemini API, Streamlit, Agile/Scrum

Education

Manipal Institute of Technology

Aug 2023 – Expected May 2027

B.Tech, Data Science Engineering (Final Year)

Activities: Technical Head @ YBee (Student Startup) · Core Committee @ TechTatva MIT Manipal · The Data Alchemists · Enactus Manipal · IEEE Student Branch · Manipal Information Security Team

Coursework: Data Structures & Algorithms, Database Systems, Machine Learning, Operating Systems, Big Data Analytics

Experience

Intellect Design Arena (FinTech) – Mumbai

Jun 2025 – Jul 2025

Software Engineering Intern

- Built EMI collection agent management platform integrating data pipelines and analytics dashboards using Python, SQL, and Apache Spark; reduced manual reporting effort by ~40% for teams managing 10,000+ loan accounts.
- Designed KPI dashboards tracking repayment behavior and agent efficiency with privacy controls across sensitive financial datasets.
- Delivered REST APIs and CI/CD pipelines (GitHub Actions) within Agile workflows, improving system reliability and cutting deployment cycles.

J.P. Morgan Quantitative Research – Forage Virtual Experience

Jun 2026

Quantitative Research Analyst (Simulation)

- Modeled natural gas price dynamics and built a commodity storage contract pricing engine in Python, incorporating seasonal forecasting and contract valuation logic.
- Developed a credit risk model using Logistic Regression; engineered FICO score bucketing via quantization to assess default probability across a loan portfolio.

Google Developer Program – Remote

2021 – Present

Premium Tier Developer – AI Pro Badge (Sep 2025)

- Early beta user of Google Taskmate (2021) — contributed to real-world data collection and geo-based task workflows supporting Google Maps and Search quality at scale.
- Selected for Premium Tier (AI Pro); received early access to Gemini Pro LLMs and Project IDX; prototyped LLM-integrated conversational interfaces using Firebase and modern AI APIs.

Projects

ChargerOS – Browser-Based Desktop OS Simulation

2025 · [GitHub](#)

React 19, TypeScript 5.9, Vite 7, Tailwind CSS, Radix UI

- Engineered a fully interactive browser-based desktop OS with a modular provider-consumer architecture (AuthContext, FileSystemContext, DesktopContext); implemented draggable/resizable window manager with dynamic z-index focus ordering and state persistence via localStorage.
- Built a virtual Unix-style filesystem supporting ls, cd, mkdir, cat, rm, neofetch and 12+ other terminal commands; shipped a 59-app suite across 8 categories including a code editor, retro games, and a database viewer.
- Architected for extensibility with lazy-loading roadmap, Playwright E2E test plan, and multi-user profile segmentation — production deployment via Vite with minified bundle optimisation.

MedRAG – Production-Hardened Clinical GenAI Platform

Mar–Apr 2025 · [GitHub](#)

Python 3.9, LangChain, FAISS, Flask, Docker, Groq/Gemini APIs

- Built full-stack RAG platform over a curated medical knowledge base (MedQA-USMLE); achieved 30% improvement in factual generation accuracy over baseline via FAISS vector search and multi-threaded index bootstrapping.
- Implemented layered security (token-based auth, rate-limiting, CORS allowlisting, payload-size caps) and dual-LLM fallback orchestration (Groq → Gemini) for high availability; evaluated output quality with real-time ROUGE-L scoring and hallucination ratio tracking.

Achievements & Certifications

LeetCode: 250+ problems solved **Certifications:** ML – Johns Hopkins · IBM GenAI & LLMs · Meta Data Analyst · Google Prompting Essentials · ISB Finance · J.P. Morgan Quant Research (Forage) · Mastercard Consulting (Forage)
